## PROFESSIONAL SUMMARY

Tier 2-focused IT support professional with experience troubleshooting Windows endpoints in fast-paced operations environments. Strong in structured triage, root-cause isolation, and clear documentation with escalation-ready evidence. Hands-on lab work in Windows 10/11 support, Active Directory workflows (lockouts, group access), DNS troubleshooting, printer/spooler issues, and PowerShell evidence collection. CompTIA Security+ certified; B.S. Cybersecurity in progress (SNHU).

## TECHNICAL SKILLS

Tier 2 Support: Incident/service request triage, troubleshooting, verification, ticket documentation, escalation packets

Windows: Windows 10/11 troubleshooting, drivers/updates, performance, permissions, Event Viewer, services.msc

Identity & Access: Active Directory users/groups/OUs, password resets/unlocks, group-based access concepts, basic GPO checks

Networking Triage: DNS/DHCP concepts, ipconfig/ping/nslookup, connectivity isolation

Productivity/Tools: Microsoft 365 (Outlook/Excel), Teams; GitHub/Markdown documentation

Automation: PowerShell scripting for evidence collection and safe remediation steps

## PROJECTS

Windows Tier 2 Support Playbook (Desktop Support II Portfolio)

Repo: [github.com/Rjsanchez0/Windows-Tier-2-Support-Playbook-Desktop-Support-II-Portfolio](https://github.com/Rjsanchez0/Windows-Tier-2-Support-Playbook-Desktop-Support-II-Portfolio)

- Built ticket-style writeups: symptoms → environment → triage → troubleshooting → resolution → verification → escalation criteria.

- Tickets cover printer queue/spooler reset, DNS failure (“no internet”), VPN triage evidence packet, Outlook/M365 sign-in loop walkthrough, and PowerShell help desk toolkit.

Active Directory Home Lab (Windows Server + Windows Clients)

Repo: [github.com/Rjsanchez0/AD-project](https://github.com/Rjsanchez0/AD-project)

- Created users/groups/OUs; practiced lockout/unlock workflows and group-based permissions for file shares.

- Documented troubleshooting scenarios including share access denied (Share vs NTFS) and validation steps.

Small Business Workstation Deployment & Security Hardening (Contract Project)

Repo: [github.com/Rjsanchez0/Small-Business-Workstation-Deployment-Security-Hardening-Project](https://github.com/Rjsanchez0/Small-Business-Workstation-Deployment-Security-Hardening-Project)

- Documented repeatable Windows 11 deployment/hardening steps for a multi-PC refresh project (local accounts, least privilege, updates/drivers, baseline security settings).

## PROFESSIONAL EXPERIENCE

Freelance IT Support Technician (Contract) — San Antonio, TX

#### Workstation Refresh & Security Hardening (6 Windows 11 PCs) | 2026

- Performed end-to-end workstation refresh for 6 PCs acquired from a closed business: removed legacy domain enrollment/locks, completed Windows 11 clean installs, and standardized device configuration.
- Created local admin + standard user accounts and applied least-privilege use to reduce unauthorized changes/installations.
- Installed/validated drivers and updates; applied OS patching and baseline security settings; produced a repeatable build checklist and handoff documentation.

#### CLEAR — San Antonio International Airport (SAT)

Assistant Operations Manager | Jan 2026 – Present

- Supported high-volume enrollment operations using mobile/iPad-based identity verification tools; troubleshoot common device/app issues to reduce downtime.
- Maintained accurate documentation and handled sensitive customer data with strong verification discipline; escalated system issues when required.

#### Spirit Airlines (via G2 Secure Staff) — San Antonio, TX

Guest Service / IT Customer Support | Jul 2023 – May 2026

- Provided frontline workstation and peripheral support (printers, check-in systems, basic network/app issues) in a time-sensitive operational environment.
- Assisted with account access issues and documented troubleshooting steps/results; escalated unresolved incidents with actionable context to corporate support teams.
- Trained new staff on workflows and common issue resolution patterns; maintained calm customer communication during disruptions.

#### EDUCATION

Bachelor of Science (B.S.) — Cybersecurity, Southern New Hampshire University (SNHU) | Expected Aug 2026

#### CERTIFICATIONS

CompTIA Security+

Google Cybersecurity Certificate
